Subject: EPA response to May 5, 2010 LWG letter re: CDF performance standards
Date: 06/01/2010 11:28 AM

Bob/Jim

EPA has reviewed the Lower Willamette Group's (LWG) May 5, 2010 letter regarding performance standards for Confined Disposal Facilities (CDF) for the Portland Harbor Feasibility Study (FS). EPA does not have any comments on the LWG's additional responses to our April 23, 2010 letter, which included clarification on issues raised in response to our February 18, 2010 letter.

EPA agrees with the LWG that the issues raised in previous comments have been resolved and appreciates that the LWG will address the CDF performance standards as directed by EPA.

Please don't hesitate to contact us if you have any questions.

Chip Humphrey
